Tech change [video]

Wanting to implement sound into the interaction, we came to the conclusion that Makey Makey wasn't going to cut it. Using Bare Conductive instead enabled more connections on one board without having to ground a user, enabling easy use by multiple users interacting with the poster all at the same time.

Tech change [video]

Wanting to implement sound into the interaction, we came to the conclusion that Makey Makey wasn't going to cut it. Using Bare Conductive instead enabled more connections on one board without having to ground a user, enabling easy use by multiple users interacting with the poster all at the same time.

More software [video]

Wanting to enable users to interact with audio to “build” their own music, having mp3’s start when you keydown and restart when you keyup enables individuals to build a techno song. Individual channels of a track will be used on each key press to build a complete song when all keys are pressed down.
