Rave
flyer V1

The purpose of our producing flyers for our rave is to build the hype and anticipation for the event, maintaining a good turnout for the recordings which will be presented in the show. Designing a simple flyer also allows us to explore the final design of our poster, building an artistic language for the piece.

This version of the flyer printed too cleanly for our liking so different printing methods will be explored.

Rave

flyer V2

A version was printed using the Risograph where red paper was used instead of red ink. The final design looked much better with this printing method. Due to the paper being hand cut from an A2 sheet, each A4 was slightly miss-aligned. However, this lead to ink layers distorting and warping which we actually valued. We feel this gives an organic and unique nature to each individual flyer.
