

Space & cost

We aim to use the studio wall space to present our piece. Technical materials such as computers/projectors provided by the university will be used to minimise our personal cost and allow the piece to live without our personal manipulation after the festival. Largest costs of the project will be the printing mediums such as paper and ink.

Health
& safety/use

We aim to keep health and safety a priority. Technical materials will be kept neat and tidy to both minimise health risks to visitors and maintain the longevity of the installation.

Technical interactions will be kept simple and streamlined to allow easy fixing on the day if necessary.
