- Black and red
- Creativity vs technicality
- Finger print
- Lines (conductivity)
- Rave-style imagery

Method of projection:
- Rear projection
  - False wall with a transparent material to project back on

Planning

Prior to putting the event live, planning what we want to convey and when we want to say it has to be outlined to maintain the mysterious atmosphere (hype) of the event.

Live event

Pushing the event live we decided to only release limited amount of information and drip feed as the event grows closer. This replicates the sporadic nature of DIY raves of the 90's and 00's. Launching early allows the attendees to plan out the date in advance and maintain a good turn out on the night.
